WHAT'S NEXT?

Building a robot to test mobile apps.

We are working on automating orientation tests, call interruption tests using Raspberry PI and Servo Motor for changing the orientation.

DOMAIN SPECIFIC TEST DATA GENERATORS

e-Commerce, Healthcare,
Dating Apps, Gaming apps
and more domain specific
test data generators are
being developed already.

TECHNICAL QUIZ APP

1000+ technical
questions in quiz way
which is fun way of
learning. Yes, its not
BLOODY ISTQB
questions. Its core
TECHNICAL. We do it
better!

SBTM WEB APP

We are building an web
app which is going to be
developed keeping testers
productivity in mind and
the app performance,
SBTM insights and lot
more features.

WHAT NEXT AFTER THESE?

We have numerous ideas to implement and give back to the testing community for free / open source.
